

INTERNATIONAL SEARCH REPORT

International application No.
PCT/AU2004/001012

A. CLASSIFICATION OF SUBJECT MATTER

Int. Cl. ⁷: A61M 25/06, 5/32

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

DWPI-IPC A61M, A61B & keywords (catheter, introduce, retract, vacuum and similar terms); USPTO & Espace with similar terms to those above

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 5487734 A (THORNE et al) 30 January 1996 See abstract and figures	1-16
A	US 6024727 A (THORNE et al) 15 February 2000 See abstract and figures	1-16
A	US 5817058 A (SHAW) 6 October 1998 See abstract and figures	17
A	US 5911705 A (HOWELL) 15 June 1999 See abstract and figures	17

☒ Further documents are listed in the continuation of Box C

☒ See patent family annex

- * Special categories of cited documents:
- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed
- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

Date of the actual completion of the international search
29 September 2004

Date of mailing of the international search report

5 OCT 2004

Name and mailing address of the ISA/AU

AUSTRALIAN PATENT OFFICE
PO BOX 200, WODEN ACT 2606, AUSTRALIA

INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2004/001012**Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Claims 1-16 relate to a cannula/catheter introducer with inner and outer tubular members, sealing means, release means, a needle holder with a release means where movement of the inner tubular member allows the release means to lock against the needle release means and vacuum retract the needle.

Claim 17 relates to a cannula/catheter introducer with inner and outer tubular members, retraction means for a puncture needle and a limit means to limit the travel of the inner tubular member, located adjacent a distal end of the introducer.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2004/001012

Box No. IV Text of the Abstract (Continuation of Item 5 of the first sheet)

A catheter/cannula introducer (41) is disclosed that allows a puncture needle (54) to be inserted into a catheter. Once the puncture needle has performed its function, it can shoot back into the device such that there is a reduced likelihood of needlestick injury. Vacuum is used to assist in the shoot back function.
